Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains more than 150 words and is three paragraphs. Abstracts should contain one paragraph and no more than 150 words.

Correction is required. See MPEP § 608.01(b).

2. The disclosure is objected to because of the following informalities: the word “flame” is used throughout the disclosure, whereas it appears that the word “flange” is intended.

Appropriate correction is required.

Claim Objections

3. Claims 4-7 are objected to because of the following informalities: as noted above, the word “flame” appears to be improper. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Zedell, Jr. et al (U.S. Patent 6,068,946). The reference teaches a battery casing comprising a lid (20), a closing unit (40), and a flange (30), the latter two forming a battery storage (see Fig. 1). As disclosed in column 2, line 48, the components may be made of plastic or metal. Means for fixing the lid and the closing unit to the flange are provided (50, 90), which means have complementary concave/convex shapes. Further, the fixing pieces on the lid and the closing unit are “meshed” with each other in the state where both are engaged with the flange. In addition, it is noted that the term “means for fixing” used throughout the claims is considered to invoke 35 USC 112, sixth paragraph, pursuant to MPEP 2181.

Thus, the instant claims are anticipated.

6. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1033766. The reference teaches a battery casing comprising a lid (2a) and a battery storage (2b). The lid and the battery storage are fixed together by means of bonding (see [0035]). The battery protection device comprises a circuit board (14) having various components (4, 31a-c) on both sides thereof (see [0037]). The board is supported by projections (34).

Thus, the instant claims are anticipated.
